Education

University of California, Davis **Jun 2026**
B.S., A.B., Cognitive Science (Computational Track), Linguistics *Davis, CA*
- **GPA:** 3.340/4.0
- **Coursework:** Computational Linguistics, Cognitive Development, Data Structures in C++

Experience

UC Davis College of Letters and Science **Jan 2026 - Jun 2026**
Web Content Assistant *Davis, CA*
- Managed web updates in Drupal for the Department of English and the Davis Humanities Institute, streamlining content publishing and improving page freshness
- Implemented webpage layout changes using HTML/CSS and Drupal theming to meet client requirements, enhancing user navigation and visual consistency
- Utilized Siteimprove to identify deficiencies in web content accessibility and quality assurance, increasing QA and WCAG scores by 50%

SamaCare **Oct 2025 - Dec 2025**
Product Design Consultant *Davis, CA*
- Redesigned SamaCare's (healthcare technology company) internal operations tool using Figma and user-research methods, which improved usability and helped staff process prior authorization requests more quickly
- Constructed an optimized user flow in Figma based on qualitative insights from user interviews, enabling staff to manage forms and updates with fewer steps
- Developed low- and mid-fidelity frames on Figma, ensuring scalability and alignment with business objectives

AlygnAI **Jun 2025 - Aug 2025**
UI/UX Design Intern *Remote*
- Redesigned the UI and created user flows for WikyAI, a generative AI tool used for analyzing proprietary documents and answering related queries, enhancing usability and navigation
- Conducted a gap analysis of existing UI components, identified redundant elements, and defined a streamlined process for recreating components and designing new features in Figma, resulting in a faster design cycle and a clearer component library
- Collaborated with the Frontend Development and Marketing teams to iterate on UI components, improving alignment with user needs and brand guidelines

Product Space @ UC Davis **Apr 2025 - Jun 2025**
Product Design Fellow *Davis, CA*
- Designed and pitched Hone, a specialized housing app for UC Davis students, completing a polished mockup and product pitch within an 8-week capstone
- Incorporated qualitative research from over 20 user interviews into the final product design, establishing a solid framework for future design implementation
- Presented the final design concept to a panel of industry judges at the product pitch showcase, winning 1st place out of 4 total teams

Projects

Anchored **Jul 2026 - Aug 2026**
Personal Project *San Mateo, CA*
- Redesigned Anchored, a news aggregator app originally built in Figma during a 4-week sprint, improving visual clarity and simplifying navigation
- Utilized Figma to expand upon features originally left unfinished, taking into account present-day user needs and demands

Chords **Oct 2025 - Dec 2025**
Design Interactive *Davis, CA*
- Designed and prototyped a music app called Chords in Figma, delivering a complete mockup within a 6-week sprint that served as the foundation for the final product concept
- Developed low-, mid-, and high-fidelity frames in Figma, integrating features and visual design elements informed by insights from over 70 surveys and more than 10 user interviews, which clarified the design direction for new features

Skills

- **Programming**: React Native, Python, RStudio, Drupal, HTML/CSS, C++, Siteimprove Analytics
- **UI/UX and Product Design**: Figma, User flow optimization and Prototyping, User Research and Testing, Ideation and Product Design, Web Accessibility
- **Languages**: Japanese, Malay
